

U.S. Route 1 Complete Streets

Project Description

The New York State Department of Transportation (NYSDOT) is evaluating the U.S. Route 1 corridor for opportunities to provide Complete Streets enhancements. A Complete Street is a roadway planned and designed to consider the safe, convenient access and mobility of roadway users of all ages and abilities, including pedestrians, bicyclists, public transportation riders, and motorists. This project will investigate recommendations to enhance safety, as well as pedestrian and bicycle facilities along U.S. Route 1. The project limits are between Dillon Road and Hornidge Road.

Conceptual Complete Streets Strategies

*The typical sections are conceptual and represent typical complete street elements
