

U.S. Route 1 Corridor Safety Enhancement

Source: Google Street View

Existing Conditions

- Travel Lanes - 9.5 ft. wide
- Parking Lanes - 8 ft. wide
- Sidewalks/Utility Strip/Snow Storage Space - 10 ft. wide
- Bicyclists Share the Travel Lane
- Curb to Curb Narrowest Width - 54 ft
- Aerial Utilities Adjacent to Parking Lane
- Closed Drainage
- Real Estate Considerations

Schedule

Stakeholder Meeting #1, July 2024
Stakeholder Meeting #2, November 2024
Open House #1 - Needs Assessment, June 2025
Feasible Alternatives Development, Summer 2025
Open House #2 - Potential Alternatives, April 2026
Design Approval, Summer 2026
Open House #3 - Preferred Alternative, Fall 2026
Final Design, Spring 2027
Construction Start TBD

U.S. Route 1

Corridor Safety Enhancement

Project Description

The New York State Department of Transportation (NYSDOT) is evaluating the U.S. Route 1 corridor for opportunities to provide Safety Enhancements. An enhanced corridor is a roadway planned and designed to consider the safe, convenient access and mobility of roadway users of all ages and abilities, including pedestrians, bicyclists, public transportation riders, and motorists. This project will investigate recommendations to enhance safety, as well as pedestrian and bicycle facilities along U.S. Route 1. The project limits are between Dillon Road and Hornidge Road.

Conceptual Corridor Safety Enhancement Strategies

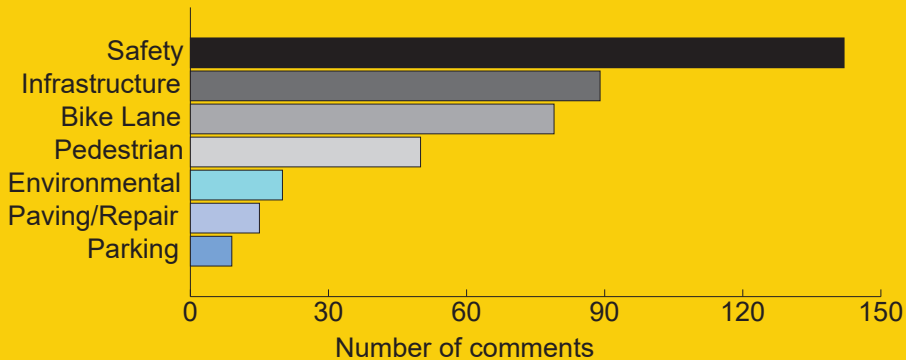

*The above sections are conceptual and represent typical corridor safety enhancement elements

Summary of Comments

89 Individual Comment Sheets

26 Email Comments

49 Post-it Comments
On The Boards

358 Post-it Comments
On the roll plot

Safety

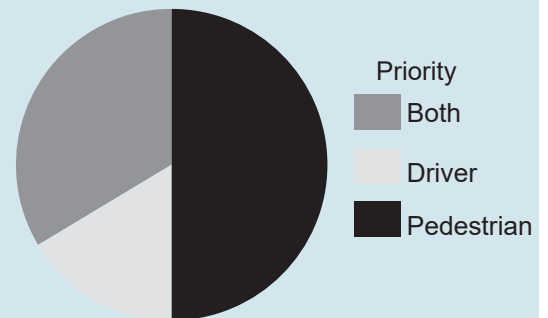

Excessive vehicle speeds and aggressive driving along the corridor

Traffic calming measures such as lane reductions, center medians, curb extensions, roundabouts, and landscaped elements

Turning lanes or protected left-turn movements to improve operational and safety conditions

Emphasis on the corridor as a walkable community with children walking to and from school

Safety Comment Breakdown

Infrastructure

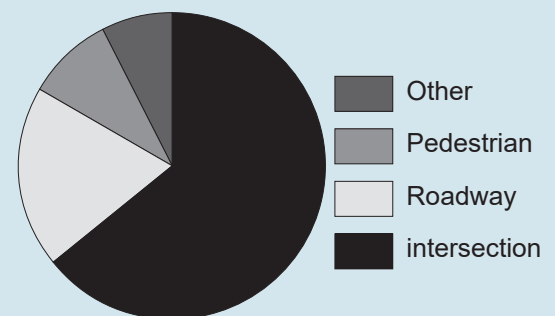

Additional trees, landscaping, and hardscaping to enhance and beautify the corridor

Parking management strategies that prioritize off-street parking

Improved pedestrian accommodations, especially at crosswalks and driveways

Sidewalk improvements and enhanced pedestrian safety and comfort

Infrastructure Comment Breakdown

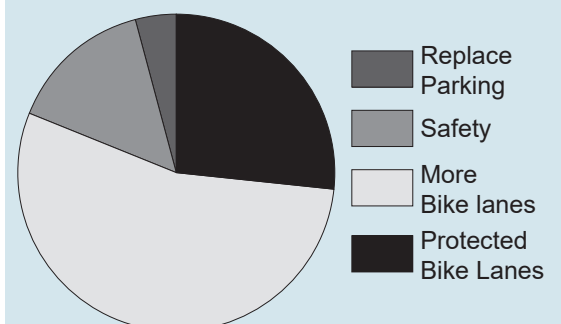

Bike Lanes

Protected bicycle facilities, particularly for children traveling to and from school

Two-way cycle tracks, buffered bike lanes, bollards, floating parking, and shared-use trails

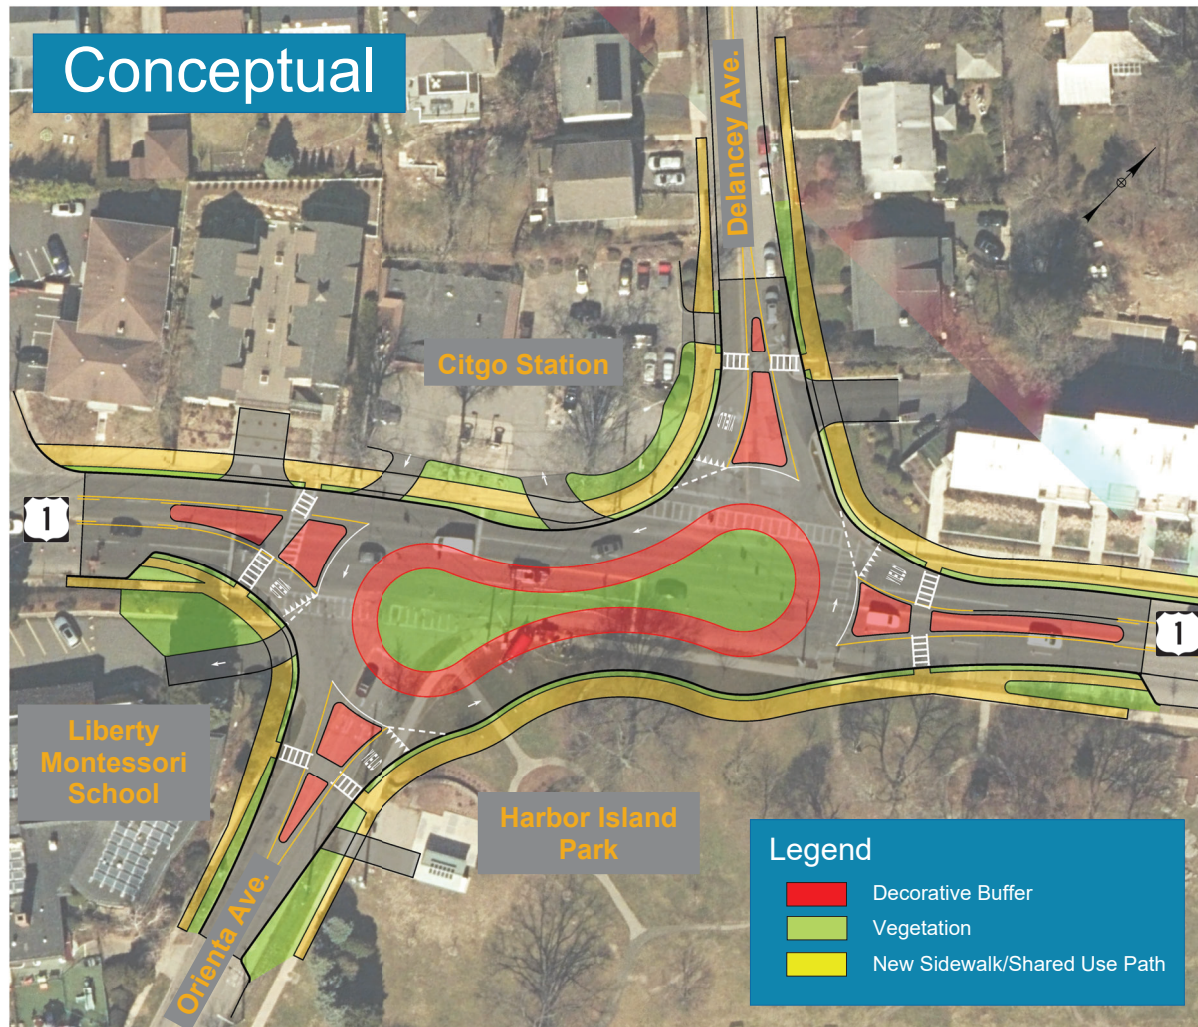

Reallocating roadway space and parking to better accommodate bicycles

Bike Lanes Comment Breakdown

Orienta Ave. and Delancey Ave. Roundabout

Conceptual

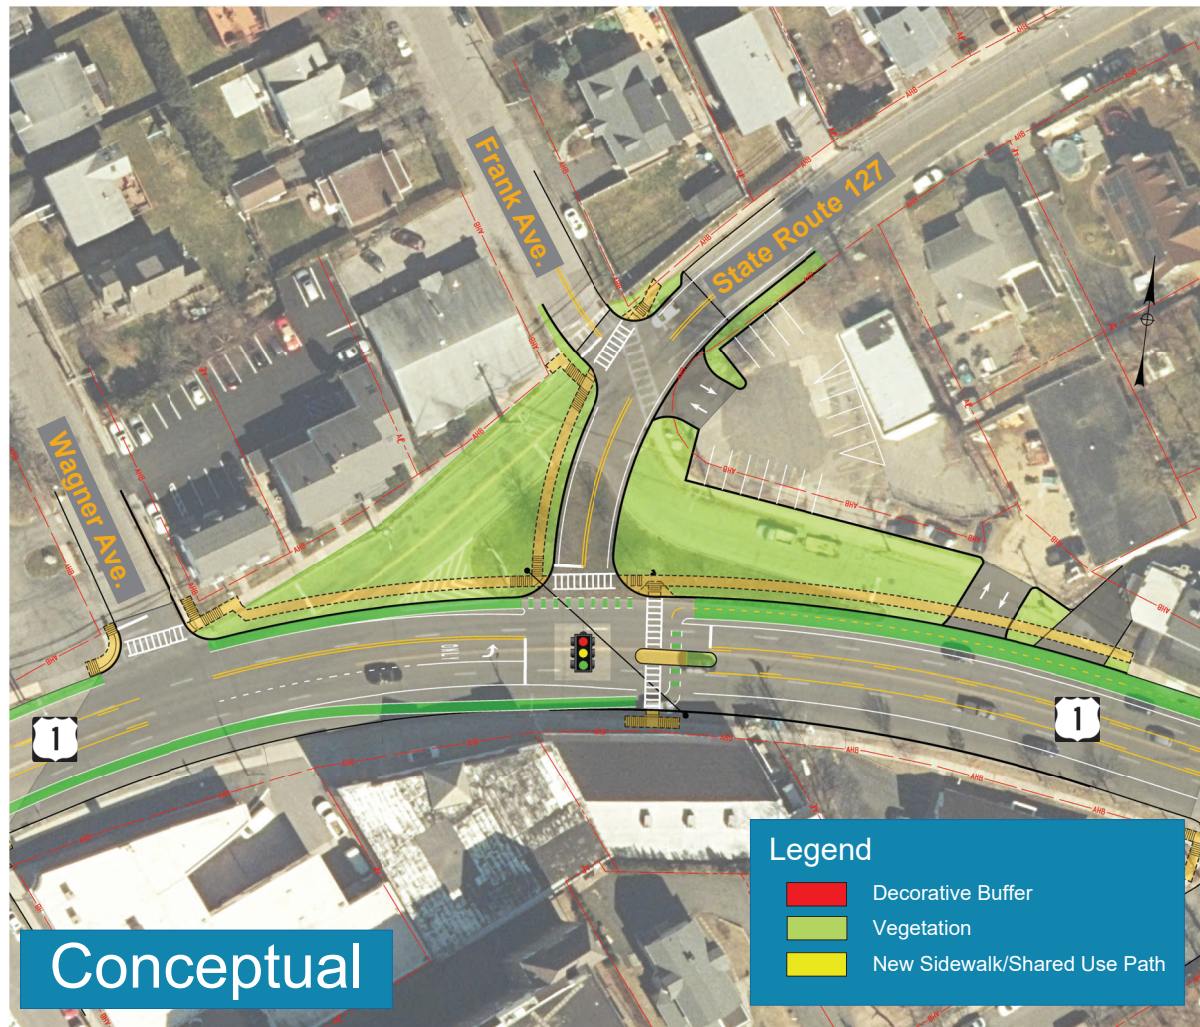

Benefits

- Reduce(s) operating speed
- Reduce(s) vehicular delays and congestion
- Integrate(s) offset intersection into roadway
- Reduce(s) crash severity
- Lower(s) operating speeds due to roundabout configuration
- Allow(s) pedestrians to cross one direction at a time via shorter crosswalks and median refuges
- Enhance(s) awareness at pedestrian crossing points
- Create(s) a gateway to the Harbor Island Park

Department of
Transportation

State Route 127 (Keeler Ave.) Signalization

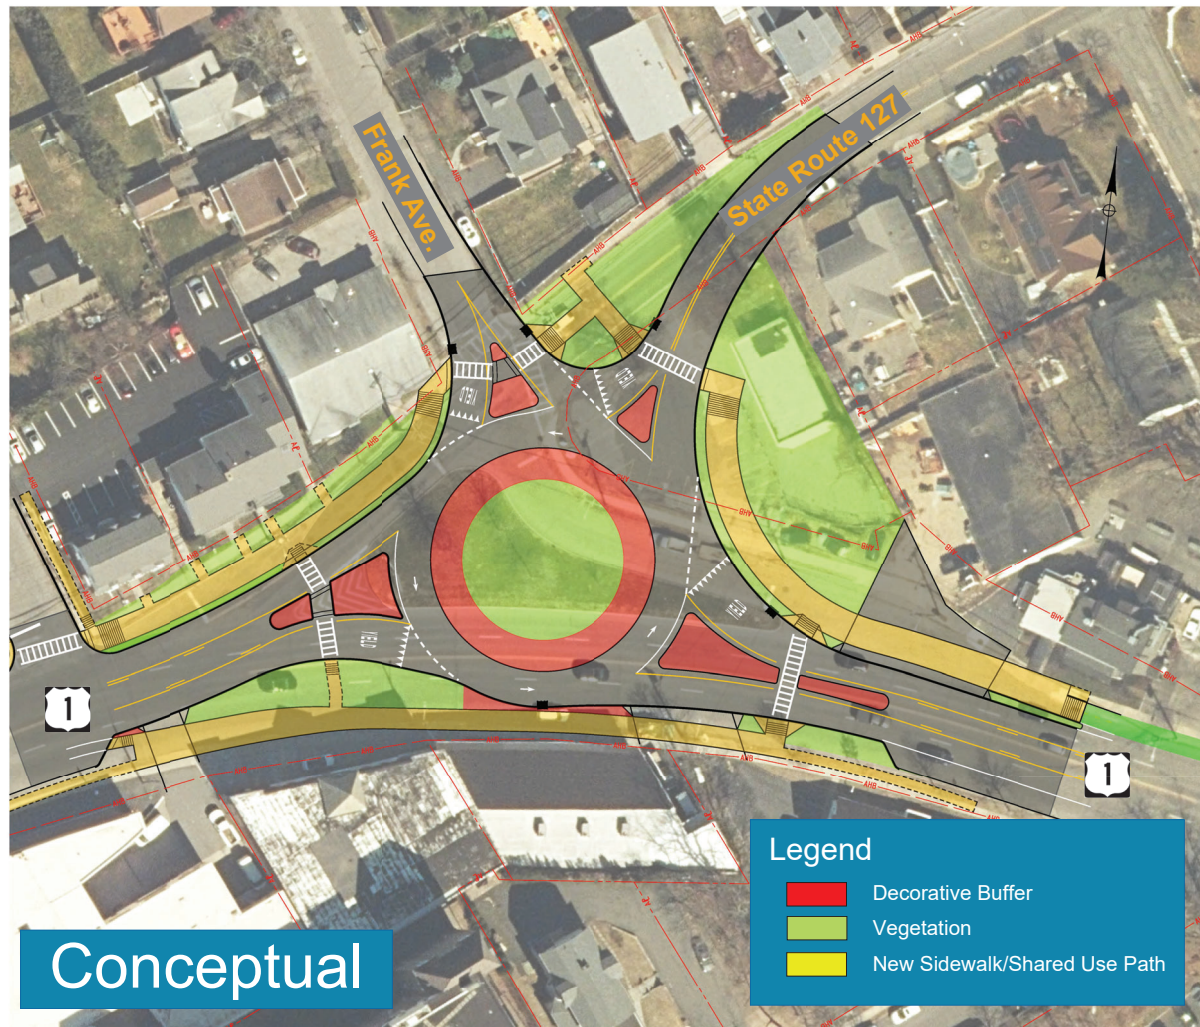

Benefits

- Enhance(s) sight lines at State Route 127 and U.S. Route 1 intersection
- Remove(s) stop signs from State Route 127 at Frank Ave.
- Increase(s) green space
- Reduce(s) walking distance along the north side of U.S. Route 1
- Allow(s) pedestrians to cross one direction at a time via shorter crosswalks
- Reduce(s) vehicle queuing with dedicated left turn lane

Department of
Transportation

State Route 127 (Keeler Ave.) Roundabout

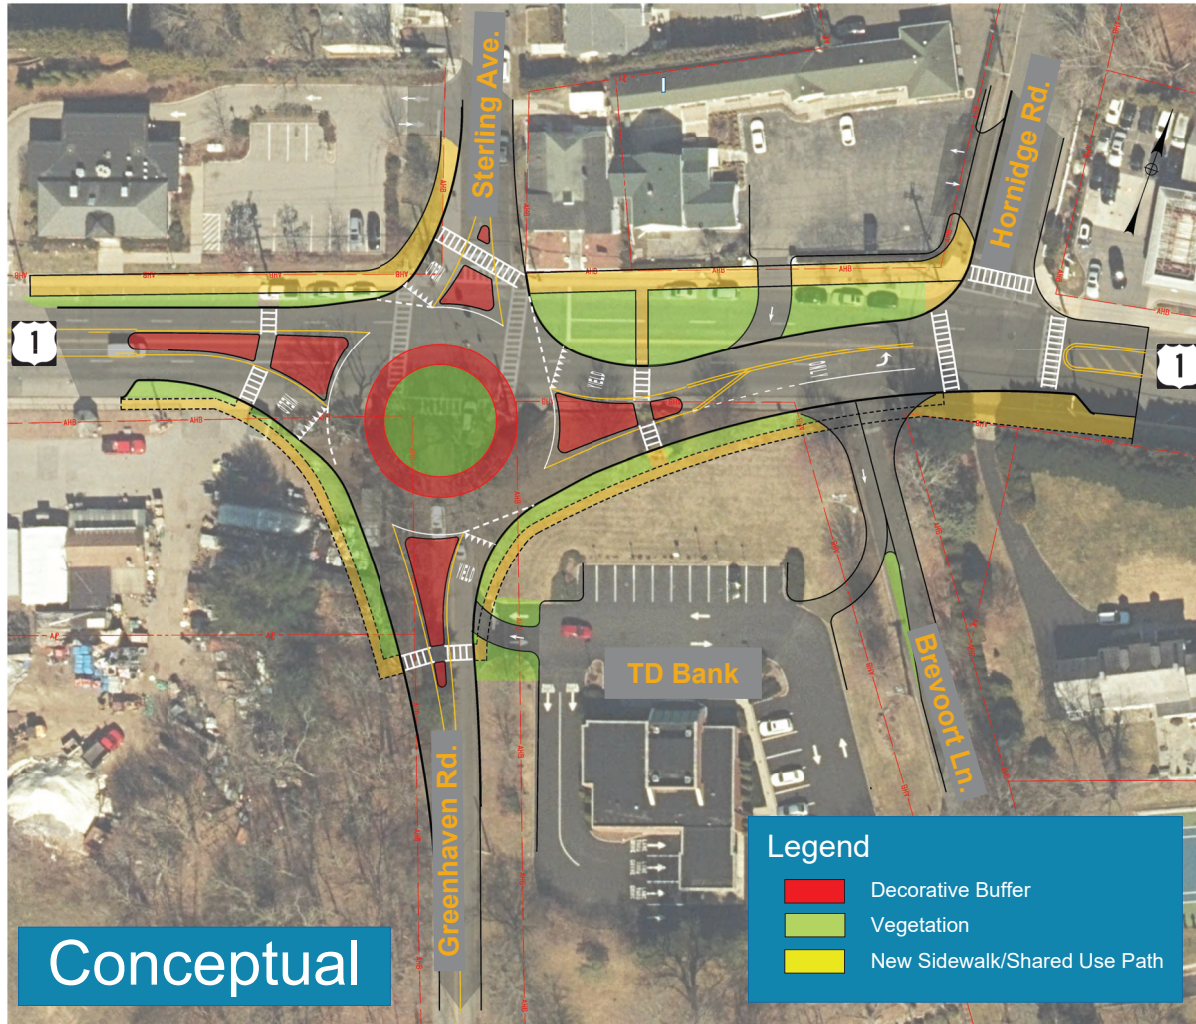

Benefits

- Enhance(s) sight lines at State Route 127 and U.S. Route 1 intersection
- Reduce(s) operating speed
- Connect(s) Frank Ave. to the intersection
- Allow(s) pedestrians to cross one direction at a time via shorter crosswalks and median refuges
- Enhance(s) awareness at pedestrian crossing points

Department of
Transportation

Greenhaven Rd. Roundabout (Alternative 1)

Benefits

Roundabouts

- Reduce(s) crash severity
- Reduce(s) operating speeds
- Create(s) a "Gateway" to the Village

Shorter Crosswalks & Median Refuges

- Allow(s) pedestrians to cross one direction at a time
- Improve(s) access to the Rye Neck Middle/High School

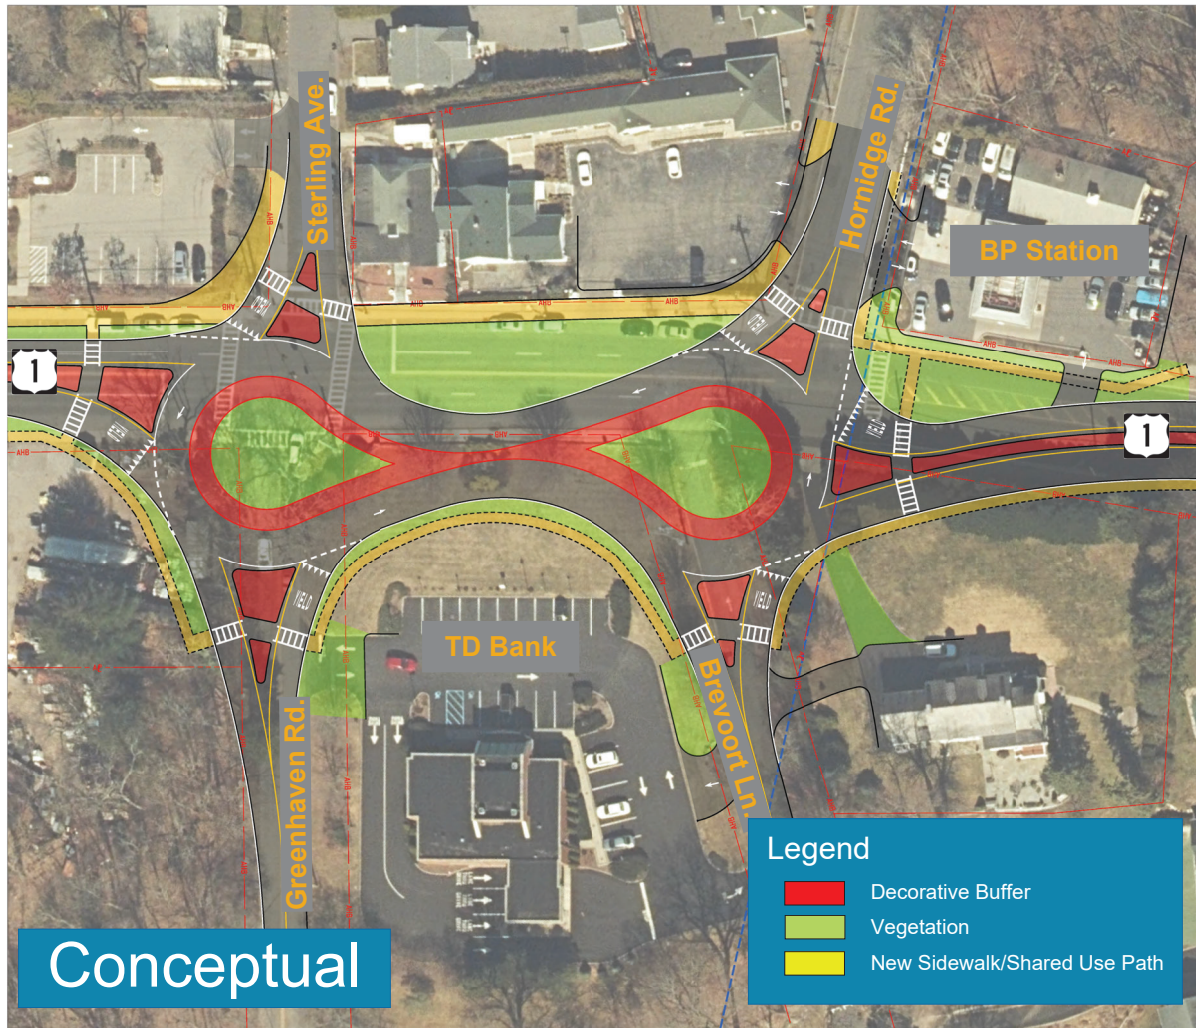

Raised Crosswalks

- Promote(s) lower vehicle operating speeds
- Enhance(s) awareness at pedestrian crossing

Department of
Transportation

Greenhaven Rd./Hornidge Rd. Roundabout (Alternative 2)

Benefits

Roundabouts

- Reduce(s) crash severity
- Reduce(s) operating speeds
- Create(s) a "Gateway" to the Village

Shorter Crosswalks & Median Refuges

- Allow(s) pedestrians to cross one direction at a time
- Improve(s) access to the Rye Neck Middle/High School

Raised Crosswalks

- Promote(s) lower vehicle operating speeds
- Enhance(s) awareness at pedestrian crossing
